Applicant argues that alternative expressions may be permitted if they present no uncertainty or ambiguity. However, this is not the case here. The claims recite alternative and distinct embodiment, not alternative expressions.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 to 4, 6, 33 and 59 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1 to 4, 6, 33 and 59 are also rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites "at least one bias mechanism coupled to said one of the support and the first occlusion to resiliently bias said one of the support and the first occlusion towards a non-pumping position while the at least one bias mechanism is out of contact with the first occlusion surface." This implies that the bias mechanism can be in contact with the first occlusion surface. There is no description in the application as originally filed of a bias mechanism which can be in contact with the first occlusion surface.

DETAILED ACTION

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's request for withdrawal of the finality of the previous Office action has been considered and deemed persuasive. The finality of the previous Office action is hereby withdrawn.

Claim Objections

Claim 1 is objected to because of the following informalities: in line 3, "e support" should read --one of the support--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1 to 4, 6, 33, 35, 37 and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims recite distinct species in an alternative manner (for example, "one of the support and the first occlusion is movable towards the other of the support and the first occlusion", and "a drive system ...coupled to said one of the support and the first occlusion"). Applicant elected one species without traverse, yet these claims still contain language which is specific to the non-elected species. By not limiting the claims to the elected species, the scope of the claims cannot be clearly ascertained.

Art Unit: 3746

This lack of description would furthermore impose an undue burden on one of ordinary skill in the art to make and use the invention.

Allowable Subject Matter

Claims 41 to 58 are allowed.

Claims 1 to 4, 6, 33, 35, 37, 39 and 59 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and/or 2nd paragraphs, set forth in this Office action.

Conclusion

Claims 22 to 31 stand withdrawn from further consideration as being drawn to species non-elected without traverse.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
